Location: Tri-Cities or a child care facility

What is responsive curriculum? Responsive curriculum is a new way to look at how we plan for children. It is influenced by the children through observation of their interests and their questions, together with documenting their experiences. It is flexible and adapts to the needs of the learner. It provides children with a variety of learning experiences and supports and helps them to maximize their learning potential. Come and join our networking group to learn and share ideas with other child care providers. No experience necessary. If you're new to responsive curriculum we will provide you with orientation materials.
